

I wish to express my support of the Indiana Telephone Privacy law and that I would urge the FCC to NOT allow banks with already established relationships to over-ride this and be allowed to make telemarketing calls. I am proud of what the Indiana Attorney General has accomplished with regard to telemarketing calls and do not wish to see any situation undo this. If I have an existing relationship with any lending institution, I can contact them if I am interested in their products or services. I am quite capable of visiting web sites and researching information. Thank you for allowing me the opportunity to voice my opinion.
